PROFILE

Self-taught Software Developer specializing in ERP systems, web development, mobile application development, and e-commerce solutions. Skilled in React.js, React Native, Tailwind CSS, JavaScript, Node.js, Express.js, and MongoDB. Experienced in developing practical software solutions, including a School Management System (ERP), a web-based chatting platform, and an e-commerce application. Also familiar with Kali Linux, Linux command-line tools, and basic cybersecurity concepts. Passionate about technology, problem-solving, continuous learning, and building secure, scalable, and user-friendly applications.

WORK EXPERIENCE

ERP Developer – Tullu Dimtu School Management System

2026 - PRESENT

Self-taught Software Developer

- Developed a School Management System (ERP) to improve school administration and academic management.
- Implemented student registration, teacher management, attendance tracking, grade management, and report cards.
- Built dashboards and role-based access for administrators, teachers, students, and parents.

Web Chatting Platform

2024 - 2026

Self-taught Software Developer

- Designed and developed a web-based chatting platform for real-time communication.
- Built a responsive user interface using React.js and Tailwind CSS.
- Developed backend services using Node.js and Express.js.
- Integrated MongoDB to manage user accounts and chat messages.

E-Commerce Application

2025 - 2026

Self-taught Software Developer

- Developed an e-commerce application for browsing and purchasing products online.
- Built responsive user interfaces using React Native and Expo.
- Implemented product listings, product details, shopping cart, and wishlist functionality.
- Integrated backend APIs for user authentication and product management.
